

67. (New) The aroma store (scent chip) of claim 60 characterized by an arrangement of microtanks in which the scent substances are held in liquid, gel or gaseous form and by a protective layer that seals the microtanks.

a1
68. (New) The aroma store (scent chip) of claim 60, wherein a reagent is assigned to the arrangement of scent substances to initiate a reaction, for example an exothermic reaction, under defined conditions.

REMARKS

The above amendments are presented in order to place this application in better condition for examination.

Respectfully submitted,

John Smith-Hill
